

Note. All records have the check tag of either *alcohol related* and/or *drug misuse*, to denote the focus of the material. To limit a search to one or the other combine the check tag with the subjects of interest. If searches do not include either terms, the materials identified will include both alcohol or drug materials.

In addition to the terms listed, it is also possible to search for a specific screening test, either by name or acronym; to search for a country, reflecting the population studied; or to search for a specific organization, again by name or acronym. updated February, 2004

Drinking Related

acetaldehyde	ALDH	breathalyzer	maternal drinking
alcoholic beverage	BAC	drinking age	non-beverage alcohol
alcoholism	bars	drinking patterns	parental drinking
definitions	beverage industry	endogenous alcohol	paternal drinking

Drug Related

abuse potential	intravenous use	parental use	route of administration
contaminants	maternal drug use	paternal use	sniffing
dose-response	needle exchange	prescribing practices	therapeutic use
drug testing	needle sharing	polydrug use	

Drugs and Drug Classes

amphetamines	crack	methadone	prescription drugs
analgesics	designer drugs	methamphetamine	steroids
anesthesia	ecstasy	methanol	stimulants
anticholinergics	hallucinogens	morphine	sympathomimetics
antidepressants	heroin	MPTP	tobacco industry
anxiolytics	illicit drugs	nicotine	tobacco, smokeless
barbiturates	inhalants	opiates	
benzodiazepines	kava	over-the-counter	
caffeine	khat	PCP	

Education

health education	knowledge	medical education	professional education
------------------	-----------	-------------------	------------------------

Etiology

biological markers	genetics	protective factors
etiology	physiological factor	risk factors

Medical Aspects

absorption	biochemistry	craving	eye movement
acute effects	blood clearance	denial	hangover
alcohol interactions	chronic effects	dependence	harmful use
auditory perception	cognitive function	drug interactions	intoxication

loss of control	motor skills	pharmacology	toxicity
memory	natural history	tolerance	withdrawal
metabolism			

Medical Conditions

accident	diabetes	Korsakoff Syndrome	STD (sexually
acidosis	epilepsy	liver disorder	transmitted
AIDS	fetal alcohol	morbidity	diseases)
benign essential tremor	syndrome	mortality	stroke
breast cancer	headache	pain	sudden death
carcinogenesis	hypertension	pregnancy	suicide
chronic disease	hypothermia	seizures	tuberculosis
cholesterol-blood	infection	SIDS (Sudden Infant	weight
delirium tremens	ketoacidosis	Death Syndrome)	

Body Systems

autonomic nervous	dermatology	intestines	renal function
system	endocrine system	muscle	reproductive system
brain	gastrointestinal	neurotransmitters	respiratory system
cardiovascular	system	pancreas	skeletal system
system	hematopoietic	peripheral nervous	sleep
central nervous	system	system	
system	immune system		

Medical Disciplines

Anesthesiology	Pathology	Ophthalmology	Sports Medicine
Dentistry	Pediatrics	Psychiatry	Surgery
Emergency Medicine	Primary Care		

Other Medical Phenomenon

biochemical marker	carbohydrate	exercise	neuropsychology
blood pressure	metabolism	fatty acids	nutrition
breast feeding	circadian rhythm	imaging	organ transplant
carbohydrate-	contraception	lipoproteins	pain management
deficient transferrin	disease concept		

Psychiatric Disorders and Symptoms

Anorexia Nervosa	Borderline Personal-	DSM (III, III-R, IV)	Post-traumatic Stress
Antisocial Personal-	ity Disorder	Eating Disorder	Disorder
ity Disorder	Bulimia	Mood Disorder	premenstrual
anxiety	chronic mental	Obsessive-Com-	syndrome
Anxiety Disorder	illness	pulsive Disorder	psychopathology
Attention Deficit	co-dependency	Panic Disorder	schizophrenia
Disorder	Conduct Disorder	Personality Disorder	stress
	depression	phobia	

Research

animal study	evaluation studies	psychometrics	self-report
case studies	longitudinal study	research	
cost benefit analysis	methodology	meta-analysis	
data analysis	prospective study	qualitative research	

Social Phenomenon

acculturation	criminal justice	government policies	occupations
advertising	system	health care access	parenting
aggression	cross-cultural	health care utilization	per capita
aging	comparison	health care reform	consumption
anthropology	divorce	health insurance	physical abuse
attitude	domestic violence	historical	prostitution
behavior patterns	driving	homicide	religion
child abuse	drug diversion	incest	sexual abuse
child care	drug trade	laws	sociocultural factor
child development	economic aspects	legalization	sociological aspect
control policy	employment	leisure	spirituality
court cases	epidemiology	managed care	use patterns
creativity	ethnography	marriage	violence
crime	gambling	media	workplace

**Special Populations
(racial, ethnic, social, and age groupings)**

aborigines	disabled	prenatal drug	women
Adult COA	family	exposure	
Alaska Natives	foreign	prisoners	<i>life span (age)</i>
Asian-Americans	gays	professional	adolescents
Asians	Hispanics	association	elderly
athletes	homeless	Puerto Ricans	fetus
Blacks	homosexuals	racial and ethnic	neonate
Children of alcohol-	lesbians	groups	preadolescent
ics	military	rural	young adult
Children of	Mexican-Americans	schools	
substance abusers	Native Americans	social drinker	
Chinese-Americans	native peoples	treatment dropouts	
colleges	Pacific Islanders	urban	

Professions and Occupation

farm worker	medical students	physician	teacher
impaired-physicians	military	prostitutes	veterans
impaired-	nurses	psychiatrist	
professionals	nursing student	psychologist	
lawyers	pharmacist	social worker	

Treatment Related

acupuncture	controlled use	ICD (9 and 10)	patient education
aftercare	detection	indigenous treatment	psychotherapy
alcohol-drug counselor	detoxification	inpatient treatment	referral and consultation
Alcoholics	diagnosis-abuse	intervention	risk reduction
Anonymous	diagnosis- dependence	interview skills	self-help
assessment	diagnostic criteria	meditation	self-help groups
aversion therapy	drug therapy	methadone- maintenance	smoking cessation
behavior therapy	employee assistance programs	miscellaneous therapies	spontaneous remission
bibliotherapy	ethics	Narcotics	therapeutic community
brief treatment	family-therapy	Anonymous	vocational counseling
case management	general treatment	natural history	
clinical skills	group therapy	nicotine replacement	
cognitive therapy	harm reduction	outpatient treatment	
compulsory treatment	hospitals	partial hospitalization	
confidentiality	hypnosis		

Patient Characteristics

abortion	expectancies	patient satisfaction	self-esteem
abstinence	gender	personality	self-medication
child development	health habits	relapse	sexual activity
compliance	health status	self-concept	
denial	motivation	self-efficacy	

Clinical Characteristic

clinician	program administration	treatment goals	treatment outcome
community agency	protocol	treatment access	treatment programs
laboratory test	screening tests	treatment intensity	
learning theory	test	treatment matching	

Other

community action	creativity	mental health centers	sexual addiction
computer	funding sources	prevention	

Type of Publication

audiovisual aid	directories	literature	review articles
bibliography	essay	policy statement	
curriculum	first person account	reference books
